INWENTARYZACJA STANU ISTNIEJĄCEGO
drzew i krzewów
rosnących w Gdańsku
na terenie należącym do
Centrum Medycyny Naturalnej
zlokalizowanym
w Gdańsku przy ul. Smoluchowskiego

Inwestor:

„ARCH – DECO” Sp. z o.o.
81-363 Gdynia ul. Starowiejska 41 / 43

Autor opracowania:

Architekt Krajobrazu

Gdańsk - Grudzień - 2014 rok
ZAWARTOŚĆ OPRACOWANIA:

Część I - opisowa

1. Opis ogólny
2. Wykaz drzew i krzewów
3. Wyliczenie opłat za usunięcie drzew
   - na 2014 rok
   - na 2015 rok

Część II - graficzna
1. Plan z naniesioną lokalizacją drzew terenie Działki nr – 122
2. Zdjęcia ilustrujące lokalizację OZNACZONYCH drzew.

Niniejsza dokumentacja może stanowić dla Investora załącznik do wniosku o wydanie zezwolenia na usunięcie drzew, zgodnie z Ustawą o Ochronie Przyrody z dn. 16.04.2004 r. wraz ze zmianami w 2010 roku (M.P. nr 76 poz. 954 z 2010 roku).
CZĘŚĆ I - opisowa

1. OPIS OGÓLNY

W stosunku do podkładu sytuacyjno wysokościowego zawierającego m/n lokalizacje drzew, stanie istniejącym na miesiąc grudzień 2014 roku wykazano w terenie miejsca w których brak jest egzemplarzy drzew w stosunku do zapisu na planie. Dotyczy to braku występowania dziesięciu pozycji drzew oznaczonych nr inwentaryzacyjnych: 47, 48, 50, 68, 76, 77, 79, 80, 86, 87.

Nasadzenia drzew i krzewów zostały dokonane w różnych okresach, niektóre ponad 100 lat temu w czasie pierwotnego zagospodarowywania tego terenu oraz w latach późniejszych (po II Wojnie Światowej) nawet do lat 80 – tych XX wieku.

Stan zdrowotno techniczny inwentaryzowanych drzew jest stosunkowo dobry poza kilkoma (już wymienionymi) egzemplarzami martwymi i zamierającymi oraz 12 szt. drzew porażonych jemiołą - dotyczy to przeważnie drzew z gatunku Lipa oraz Klon oraz Głóg, oznaczonych numerami: 11, 12, 24, 25, 26, 27, 32, 38, 44, 45, 46 i 75. Drzewa te w związku z silnym porażeniem pasożytem jakim jest Jemioła klasyfikują się do bezzwłocznego usunięcia w celu ochrony (uniknięciu zarażenia tą pasożytą innymi drzew i krzewów ozdobnych).

Dodatkowo zainwentaryzowane drzewa i krzewy zostały „opisane” w formie tabelarycznej i oznaczone numerami: od 1 do 85 oraz naniesione na plan sytuacyjny.

W tabeli przedstawiono:
- numery inwentaryzacyjne drzew i krzewów,
- nazwy gatunkowe łacińskie i polskie drzew i krzewów,
- parametry drzew i krzewów:
  (obwód pnia na wysokości 130 cm, wysokość drzewa, średnicę korony drzewa w m lub w m² powierzchni podaną dla występujących tam krzewów, szacunkowy wiek),
- w uwagach podano w skali 1-10 stan zdrowotno - techniczny drzew i krzewów

Uwaga:

*** Na zainwentaryzowanych, występujących w terenie drzewach zarówno liściastych jak i igiastych nie występują plechy grzybów i porostów z grup prawem chronionych.

Napiszał:

Ostatnie w rzędzie drzewa są oznaczone jako "Drobny posuszu". Wyszczególniono drzewa wykonane zabiegi sanitarne polegające na usunięciu posuszów oraz gałęzi z pni do wysokości około 3,5 metra. Drzewa oznaczone jako "Silne uszkodzenie kory u podstawy pnia" są również wykonane zabiegi sanitarne. Drzewa oznaczone jako "Mursz miękkich, zablokowane rany, Jemiota" są wykonane zabiegi sanitarne polegające na usunięciu posuszów oraz gałęzi z pni do wysokości około 4 metrów. Drzewo oznaczone jako "Ubytek wglębnym od podstawy pnia do wy. 1,4 m mursz miękkim, " jest wykonane zabiegi sanitarne polegające na usunięciu posuszów oraz gałęzi z pni do wysokości około 4 metrów.
